

MCLZ 500 → LOCKING PROCEDURE

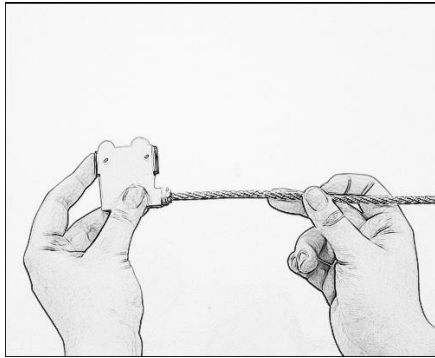

Diagram A

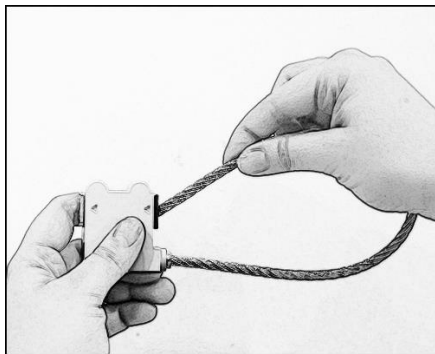

Diagram B

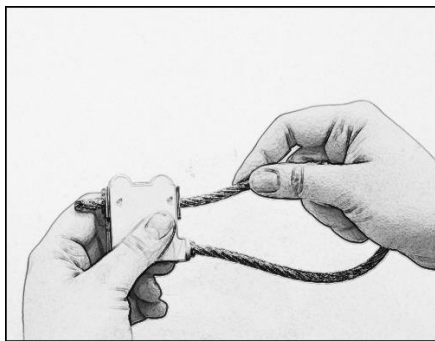

Diagram C

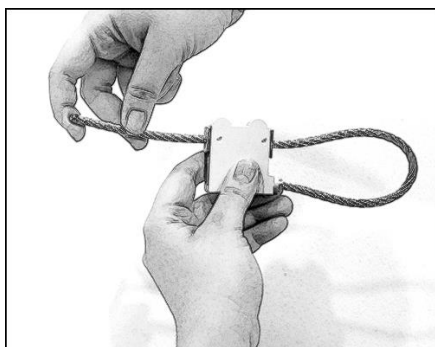

Diagram D

STEP 1

Make sure the seal body is held with the front side facing the user, as shown in Diagram A.

STEP 2

Hold the seal body using one hand and with the other, insert the wire to the entry hole as shown in Diagram B.

STEP 3

Then, push the wire until it appears on the other side, as shown in Diagram C.

STEP 4

Finally, pull the wire tight till the maximum and ensure there is no gap left after sealing, as shown in Diagram D.
