

## HIGH SECURITY SEAL

### FLEXI KLICK (FLXK)

Container Bolt Seal

***Flexibility and security in a click.***

Flexi Klick is uniquely designed with flexibility added into its strong locking mechanism. This feature prevents ricochet and comes with an anti-spinning feature. Flexi Klick is ISO 17712 and CTPAT compliant. The seal's flexibility complements its high security. These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

#### Applications:

- Containers
- Trucks
- Trailers
- Rail Cars

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

PREVENTION · PROTECTION · PEACE OF MIND

- 1 The Flexi Klick comes with an anti-spinning design that the locking mechanism allows only one-way entry and hinders friction from external force.
- 2 The extra long flexible steel wire cable pin allows easy application and is safer to cut and provides excellent protection against crude tools. The pin will bend upon impact.
- 3 The pin and bush are moulded in high-impact PP material to form into a durable pin and plastic barrel while withstanding extreme weather conditions of -20°C to 80°C. Pin and barrel are paired engraved for easier handling.
- 4 Irreversible identifiers such as name, logo, barcode, serial number and QR code are laser-marked on the pin and barrel to prevent parts substitution or replacement.
- 5 Ribbed design on the plastic barrel prevents tampering on the identifier.
- 6 Additional wavy printing surface on pin gives clear evidence of tampering or removal of identifiers.
- 7 These seals include the BioSphere bio-additive.
- 8 The seal is designed, tested and certified ISO 17712:2013.
