

INDICATIVE SEAL

FORT CASH BAG SEAL (FCBS)

Pull-Tight Seal

Indicative seal paradigm for security and authentication.

Fort Cash Bag Seal is a classic indicative seal with a flat strap for tight securing of assets. With a variety of options for strap lengths and a greater space for laser marking. The spikes on the back and the locking ribs on both sides of the seal give enhanced security, as well as clear evidence of tampering. These seals include the BioSphere bio-additive. To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

Applications:

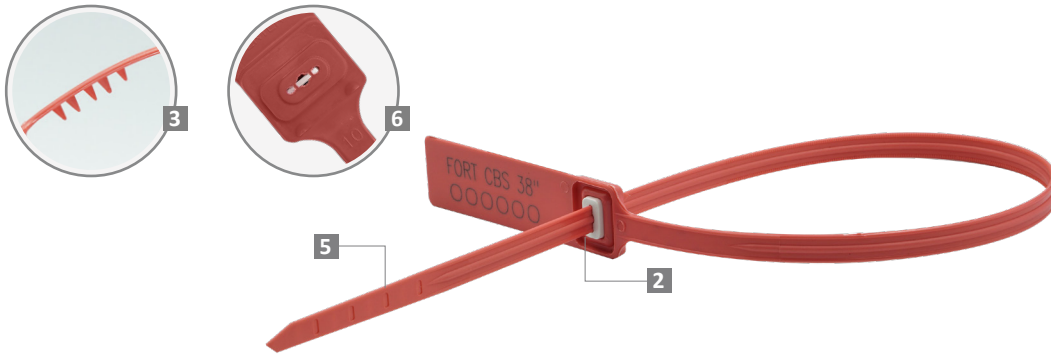

- Pharmaceutical
- Petro-Chemical
- Retail Applications
- Postal Services
- Logistics
- Banking

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

- 1 The Fort Cash Bag Seal is moulded with Polypropylene (PP) or high-impact Nylon (NY) material with the metal lock ultrasonically and heat staking encapsulated for greater security and clear evidence of tampering.
- 2 One-way locking mechanism is embedded for fast and easy application.
- 3 Spikes are placed behind the seal to provide better gripping on the application surface.
- 4 These seals include the BioSphere bio-additive.
- 5 Different strap lengths are available to cater to different applications.
- 6 Security rib at the entry locking hole to prevent pre-tampering.
