

INDICATIVE SEAL

MEGA HASP PADLOCK (MEHAP)

Application Seal

Visible and vibrant locking insert for versatility and product security.

Mega Hasp Padlock features a stainless-steel insert for effective locking for different applications. The seal is slim and space-saving, hence ideal for sealing on roughly handled applications. It has a clear body and vibrant colour insert which allow quick inspection of locking and colour coding to ease operation.

These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

Applications:

- Authentication Tagging
- Aircraft Carts
- Retail Applications
- F&B Applications

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

PREVENTION · PROTECTION · PEACE OF MIND

- 1** The Mega Hasp Padlock is moulded with high-impact clear PC plastic material and stainless-steel spring insert to ensure light and durable quality for different applications and clear evidence of tampering.
- 2** A wide range of vibrant pastel colour inserts complement the clear padlock body for inspection and colour coding to ease operation.
- 3** One-way snap-on locking mechanism is embedded for fast and easy application, as well as quick evidence of tampering or removal at the noticeable breaking point.
- 4** Irreversible identifiers such as name, logo, barcode, serial number and QR code are laser-marked on the body.
- 5** These seals include the BioSphere bio-additive.
