## INDICATIVE SEAL

# MEGA TWISTER BARCODE VERTICAL (MTW BV)

### Application Seal

#### ***Fundamental and feasible piece for quick utility security.***

Mega Twister Barcode Vertical is an improved Mega Twister Seal designed for cost efficiency without degrading the quality. It is an elementary utility seal designed with essential tamper-evident features. Mega Twister Barcode Vertical has a translucent body for quick inspection of the twister insert sealing, where colour coded inserts and its ample identifier marking area eases operations. The seal is small in size and versatile for any securing and identifying purposes. These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

#### **Applications:**

- Utility Meters & Scales
- Chemical and Oil Refinery
- Transportation
- Banking

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

PREVENTION · PROTECTION · PEACE OF MIND

- 1** The Mega Twister Barcode Vertical is produced with a twister locking insert in a plastic translucent body for a clear view of the locking and evidence of tampering.
- 2** The standard wire for various applications is stainless steel (SS) coated wire. Other wire types are available upon request. With the wires, the twister locking mechanism ensures quick and tight securing of the security seals.
- 3** A marking area flap is placed on the bottom for irreversible laser marking of identifiers such as name, logo, barcode, serial number and QR code. Vertical marking area depends on customer application and requirements.
- 4** For Mega Twister Barcode Vertical, colour coding is possible with a combination of translucent plastic body and our offered colour choices for the vibrant colour insert.
- 5** These seals include the BioSphere bio-additive.
