STORAGE SECURITY

SECURITY TOTE BOX (TOTE BOX)

Tamper-Evident Storage

A quality-assured, durable box designed for sustainable security.

Security Tote Box has a user-friendly and versatile structure made of high-impact plastic material for rigid and durable properties, as well as a space-saving nesting feature. The box is designed extensively for better application and security purposes. Clip Box Seals are ideal for securing the Security Tote Box. These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

Applications:

- Defense & Law Enforcement
- High-value Retail
- Chemical & Pharmaceutical
- Hospitality & Entertainment

BIODEGRADABLE Additives Enhanced

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

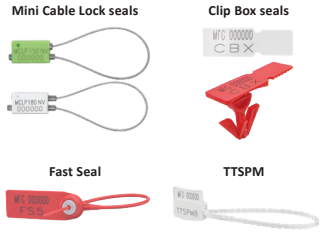
RECOMMENDED PAIRING SEALS



and many more...

VIEW APPLICATION VIDEO

TOTE BOX

1. The Security Tote Box is moulded from high-impact plastic for durability and built to withstand rough handling.
2. The lid is designed with a special closing mechanism to provide complete sealing with security seals for extra security.
3. Protruding stands on lids makes stacking more stable and safe when fully loaded and moving.
4. The banding strap and anti-slip lid structure help stabilise boxes during transit.
5. Side label holders provide space for cards or labels, along with a textured area for adhesive labels.
6. A stylish handle design ensures a comfortable grip for easy carrying.
7. This security box is used in conjunction with the Clip Box Seal or other security seal.
8. Irreversible identifiers such as name, logo, barcode, serial number and QR code can be laser marked on the box lids and sides, otherwise on the recommended pairing seals.
9. These seals include the BioSphere bio-additive.
