SECURITY SEAL

MINI CABLE LOCK PREMIUM 250 2K (MCLP 250 2K)

Pull-Tight Barrier Seal

All-inclusive premium seal for security requirements.

Mini Cable Lock Premium 250 2K is delicately designed with various tamper-evident features. It is moulded with Mega Fortris' patented two-colour body for improved visibility and to deter tampering attacks.

This seal is ISO17712:2013 certified. These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

Applications:

- Valve Sealing
- Retail Applications
- Logistics
- Banking

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

PREVENTION · PROTECTION · PEACE OF MIND

- 1 The Mini Cable Lock Premium 250 2K is moulded in PP material with non-preformed galvanised steel wire to show clear evidence of tampering.
- 2 One-way locking mechanism is embedded for fast and easy application. The additional tips at both ends provide greater protection. Mini Cable Lock Premium 250 2K has a grooved design and features an irregular pattern on the body to prevent tampering and give clear evidence of tampering on the identifier.
- 3 Default rigid body allows for durable usage of the seal while the additional colour on the 2K body improves definition of laser markings, visibility, and identification.
- 4 Irreversible identifiers such as name, logo, barcode, serial number and QR code are laser-marked on the body.
- 5 These seals include the BioSphere bio-additive.
- 6 Plastic material can withstand extreme weather conditions of -20°C to 80°C.
- 7 This seal is certified under the “S” category of ISO17712:2013 Clauses 5 and 6.
