SECURING THE GLOBAL SUPPLY CHAIN

With over 25 years of experience, our company has secured and protected your operations and assets.

TODAY,

The innovations and designs of Mega Fortris solutions provide comprehensive and reliable protection around the world.

Our strong global presence is strengthened by numerous offices and authorised distributors spanning across more than 33 countries.

OUR FACILITIES

From our initial Malaysian factory and office, we have grown to become a global entity with offices spanning across six continents to provide and supply our customers with the best quality and service. At headquarters, our factory has expanded to three facilities to accommodate our growth and your demand.

Directly across the main factory is the operations for our Security Bags, which was opened in 2021.

With the Group's tremendous growth, our production facilities have simultaneously grown to support the ever-increasing demand of our products.

Mega Fortris Bio-Additive Enhanced Seals Redefining the future of security, one seal at a time.

Amidst growing global concerns about environmental sustainability, Mega Fortris is taking proactive steps to address its ecological footprint.

Taking evolution one step further, Mega Fortris Group, who has always been committed to developing products that support a sustainable environment and to contribute to a better future, lead the way in offering eco-friendly products to our customers, partnering with them to minimise plastic waste. Our commitment to sustainability is evident in our installation of solar panels for renewable energy, as well as our practice of recycling raw materials, surplus items, runners, and recycled plastics in our manufacturing processes.

Building on a Foundation of Sustainability, we're proud to unveil our latest initiative, one that reinforces our steadfast commitment to environmental sustainability. By incorporating bio-additives into our entire range of security seal products, this evolutionary approach ensures that our products not only provide protection but also actively contribute to environmental sustainability.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13 May 2024, comprehensively securing the global supply chain while reducing our footprint.

By incorporating bio-additives, we're not just differentiating ourselves from the competition; we're setting a new standard for responsible business conduct. Our journey toward sustainability is evolutionary, driven by innovation and social responsibility.

So, what exactly are these bio-additives, and how do they work? Essentially, the bio-additives serve as catalysts for anaerobic microbes, enabling them to break down plastics into byproducts such as low-weight non-toxic compounds, and water. By leveraging chemical mechanisms to disrupt the strong bonds inherent in plastic polymers, these additives facilitate the biodegradation process, paving the way for a circular economy where waste is minimised, and resources are conserved. The byproducts of degradation are both non-toxic to the environment and

compatible in recycling. This next step is a significant improvement in jointly sustaining the supply chain and the environment.

Central to our sustainability ethos is the establishment of an ESG working group, equipped with a comprehensive policy and strategy that aligns seamlessly with our overall business objectives and the United Nations Sustainable Development Goals. This strategic framework is integral to our operations, ensuring that sustainability is a guiding principle ingrained in our brand.

We're also taking proactive steps to educate our customers on the proper handling and disposal of our products. Through our ESG Materiality Topics management, we're paving the way for responsible consumption, one informed decision at a time.

Our vision extends beyond bio-additive resins. As part of our future vision, we're continuing our efforts to develop fully compostable, non-fossil fuel-based resin security seals. Together, let's redefine the future of security, one seal at a time.

Total Transfer Label

Tamper-Evident Labels

These high-quality adhesive TE tapes & labels are suitable for either indoor or outdoor use. Heat and freeze-resistant, they are also resistant to freon gas. When peeled, a hidden message is revealed to indicate tampering or removal.

Applications include the securing of:

- Confidential documents
- Security envelopes
- Evidence bags
- Utility meters and timers
- Cash boxes and ATMs
- Ballot boxes
- Canisters and drums
- Food and beverage containers

TAMPER-EVIDENT SECURITY BOXES

TLCS

Triple Lock Casino Seal

M: PP

A: Hospitality and entertainment, evidence securing, retail applications, banking

MCAB

Mega Secure Boxes

The Mega Secure Box is designed for a wide range of applications in the hospitality and entertainment, financial services, retail and police sectors. With easy manual locking, high visibility of tamper attempts, and the ability of quick visual inspection of the seal and box contents, the security box is a strong and effective addition to any security system. The boxes can be paired with a range of seals for further security.

M: High-impact polycarbonate (PC)

A: Hospitality and entertainment, evidence securing, retail applications, banking

CBX

Clip Box Seal

M: PP

A: Authentication tagging, evidence securing retail applications, banking

Tote Box

Security Tote Box

M: High-impact food grade PP

A: Defense & law enforcement, high-value retail, chemical & pharmaceutical, hospitality and entertainment

GB Box

Gold Bullion Box

M: High-impact (ABS)

A: Defense & law enforcement, high-value retail, chemical & pharmaceutical, hospitality and entertainment

The reusable boxes are designed to easily secure and move goods, especially in harsh conditions. They are lightweight, durable and rigid, hence suitable to contain heavy items. The boxes are recyclable, reusable and water-resistant, making them suitable for all industries and purposes. With a special lid-closing mechanism, the user can also add a security seal to secure the box and monitor for any possible tampering.

TAMPER-EVIDENT SECURITY BAGS

Generic STEB

M: Low Linear Density Polyethylene (LLDPE), Co-Extruded 3 layers

A: Gaming and leisure, cash-in-transit, courier, postal, energy, airline catering, airlines, money changer, hospital patient property bag, correction center prison property bag, toll booth collection, education examination paper

Breathable, Triple & Twin STEB

M: Low Linear Density Polyethylene (LLDPE), Co-Extruded 3 layers

A: Gaming and leisure, cash-in-transit, courier, postal, energy, airline catering, airlines, money changer, hospital patient property bag, correction center prison property bag, toll booth collection, education examination paper

ICAO STEB

M: Low Linear Density Polyethylene (LLDPE), Co-Extruded 3 layers

A: Airport and duty-free supply chain security

REUSABLE SECURITY BAGS

MTCH & MTCS
Mega Tebco Chamber Housing & Seal

M: ABS, PP
A: Authentication tagging, evidence securing retail applications, banking

MMS
MM Seal

M: ABS
A: Authentication tagging, evidence securing, retail applications, banking

All bags can be customised and manufactured into various sizes, shapes, colors, windows, handles (with constructive requirement subject to review). Our reusable bags can be made from various fabric materials such as PVC, polyester, nylon and canvas.

The unique feature of this bag is the locking via reverse zipping terminal with a fully closed chamber system. Secured on the closed chamber with a unique sequential numbered security seal, it works to prevent tampering and is highly tamper-evident.
